

BIG DATA  
DEVELOPMENT

**ACADGILD**

# Session 1: How to Solve Big Data

---

## Assignment 2

*Assignment 2 – Try the given quiz questions and forward the answers in a word document.*

## **Table of Contents**

1. Introduction .....	3
2. Objective .....	3
3. Prerequisites .....	3
4. Associated Data Files .....	3
5. Problem Statement .....	3
6. Expected Output .....	7
7. Approximate Time to Complete Task .....	7

### 1. Introduction

In this assignment you need to select one right choice for the questions given on the topics discussed in the first session.

### 2. Objective

This assignment will help you to consolidate the concepts learnt in the session 1.

### 3. Prerequisites:

None

### 4. Associated Data Files

None

### 5. Problem Statement:

#### 1. What constitutes Big Data?

- a. volume
- b. velocity
- c. variety
- d. All the above

Answer : D

#### 2. Solution Identified to handle Big Data is?

- a. Hadoop
- b. storm
- c. spark
- d. All of these

Answer : D

**3. Doug cutting added DFS & MapReduce support to:**

- a) Nutch
- b) spark
- c) GFS
- d) facebook

Answer : A

**4. Which file system is followed by Hadoop?**

- a. DFS
- b. GFS
- c. HDFS
- d. NTFS

Answer : C

**5. How much data can be considered as a BigData with regards to volume?**

- a. Mega Bytes
- b. Terabytes
- c. Petabytes
- d. b & c

Answer : D

**6. Can Hadoop process data in real time?**

- a. Yes
- b. No
- c. None of these

Answer : A

**7. Hadoop is developed using?**

- a. C
- b. C++
- c. Java

d. Ruby

**Answer : C**

**8. Hadoop reduces cost of operation by?**

a. Using commodity Hardware

b. Using less number of nodes

c. Limited cluster size

d. None of these

**Answer : A**

**9. Search engine adopted in Hadoop is?**

a. Google

b. Yahoo

c. Solr

c. AOL

**Answer : C**

**10. Stream processing can be achieved in Hadoop using?**

a. Storm

b. Spark

c. Both of these

d. None of these

**Answer : C**

**11. What is the highest data unit we have at present?**

a. Petabyte

b. Exabyte

c. Terabyte

d. Brontobyte

**Answer : A**

**12. Hadoop is well suited for clusters where:**

- a. Number of nodes keep changing
- b. Number of nodes are constant
- c. Most number of free nodes
- d. None of these

Answer : A

**13. What is batch processing?**

- a. processing of previously collected jobs in a single batch.
- b. processing of previously collected jobs in different batches.
- c. processing of jobs at that moment they are collected
- d. None of these

Answer : B

**14. What is stream processing?**

- a. Processing data as streams
- b. Processing data in batches
- c. Both of these
- d. None of these

Answer : A

**15. Hadoop uses?**

- a. Batch processing
- b. Near Real time processing
- c. Real time processing
- d. All the above

Answer : D

## **6. Expected Output**

None.

## **7. Approximate Time to Complete Task**

10 mins
